About Us

Markit On Demand is a 340-person design, development, deployment, and hosting services company, dedicated to creating solutions for the Financial Services industry. Our compelling, presentation-rich services for financial professionals and individual investors have won acclaim for our clients.

Many of our client relationships span five or more years. As an independent aggregator of information, we maintain partnerships with more than 130 providers of market and financial content including Thomson Reuters, Standard & Poor's, Lipper, and Econoday. We support more than 1,800 data feeds. In addition, Markit On Demand counts many of these data providers among our clients, developing and hosting their reports and web sites.

We strive to be the most competitive and comprehensive resource for our clients' technology needs. Our capabilities evolve continuously as market trends change, putting us ahead of the curve and providing our clients with the most innovative and compelling solutions.

One of these solutions is ResearchTeam, which draws on our expertise in the areas of research data aggregation and analysis. ResearchTeam allows our clients to find the top performing research providers, use them in combination, measure performance using various performance methodologies and strategies, and easily integrate analysis results through detailed reports, lists, stock screeners, and rating change alerts for their end users.

ResearchTeam Methodology

ResearchTeam is the consolidation of coverage from each research provider on the team, where a minimum of two providers must have recommendations for a company for ResearchTeam to issue a rating. If a minimum of two research providers do not have a rating for a company, then the team rating for the stock is "Not Rated". All of the research providers must have unanimous Buy ratings for ResearchTeam to issue an 'Accumulate' rating. It takes only one opinion to make any other rating. A single 'Sell' rating will make the team rating for that stock a 'Reduce'.

How the ResearchTeam Rating Provides Greater Positive Performance
